

## Dental Implants

Do you want to  
Improve your smile?  
Replace missing teeth?  
Improve Chewing?

Dental Implants are a safe and reliable treatment solution to replace missing teeth.

What is a Dental Implant?

Dental Implants are a great way to replace missing teeth and are used to support single or multiple replacement teeth and dental bridgework.

Dental Implants are made from titanium which is inserted into the jawbone to which crowns, bridges or a denture can be attached once the surrounding tissues heal. Implants may be a great option for you.

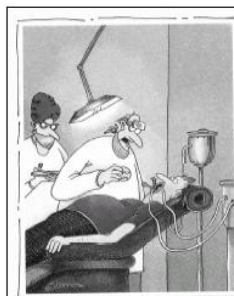

**We place implants here at Southside Dental Options.  
Book a consult appointment today.**

**NEW PATIENTS WELCOME.  
REFER FRIENDS AND FAMILY**

## Thanks...

We really appreciate our existing patients and their ongoing support for our Dental practice. Our mission is to assist in maintaining good general dental health and smiles of as many people as possible, so we always welcome New Patients to Southside Dental Options. We understand the referrals from our existing patients are the most valuable marketing we have so we Thank you.

"Now open even wider, Mr. Stevens... Just out of curiosity, we're going to see if we can also cram in this tennis ball."

## IT'S NEVER TOO LATE TO HAVE STRAIGHT TEETH

### Invisalign®

Commonly known as 'invisible braces'. Invisalign® is available for adults and now, also for teenagers. Invisalign® is a series of clear, removable aligners which gradually correct the rotations of the teeth.

Free Invisalign® consults available.

### Fastbraces®

The biggest question for someone who may need braces would probably be "how quickly can I get them off?" Fastbraces® measure treatment time in months instead of years. Some patients see results in just a few weeks! If you have been considering straightening your teeth, but have been put off by 2 years of having to wear braces or the cost of Invisalign why not consider fastbraces®. Fastbraces is fast, safe, easy and affordable. Call and organise a consult appointment today to see if fastbraces® is an option for you.

*At Southside Dental Options we offer Invisalign®, Fastbraces® and Conventional Braces.*

\*Brush at least twice a day. Soft toothbrushes are kinder on gums\*

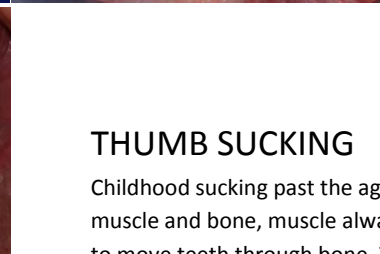

**FASTBRACES®**  
Before and After  
Result after 11mths

**BLEACHING AND DIRECT VENEERS**  
Before and After

**MYOBRACE®**  
Before and During  
Result after 4mths

### MYOBRACE® KIDS

We would like to express how happy we are with our Myobrace® kids. We have seen some fantastic results and are really impressed with the dedication to the process that most children have shown.

*\*Have regular oral health checkups – don't wait for a problem\*.*

*\*Red or Swollen gums? – see a dentist\**

### Goodbye.....

Unfortunately we say goodbye to Dr Gaurav Sharma. He will be leaving us and heading home to Canada.

Gaurav has been working with us for 7 years in a surgery full of females and this in itself is no easy feat. We will all miss his quick and witty sense of humour and wish him the very best on his future journey.

### THUMB SUCKING

Childhood sucking past the age of five is a habit that is difficult to stop. Whenever there is a contest between muscle and bone, muscle always wins. The tongue, lips, thumb and fingers are all capable of exerting forces to move teeth through bone. The Jaw remains down during sucking, and the tongue is positioned to the middle or down to the floor of the mouth. This creates significant changes that have the potential to alter the bite, oral development and growth of the facial structure.

Myobrace® may be an option for your child. Ask us how.
